Frequency & Body

The Cellular Communication

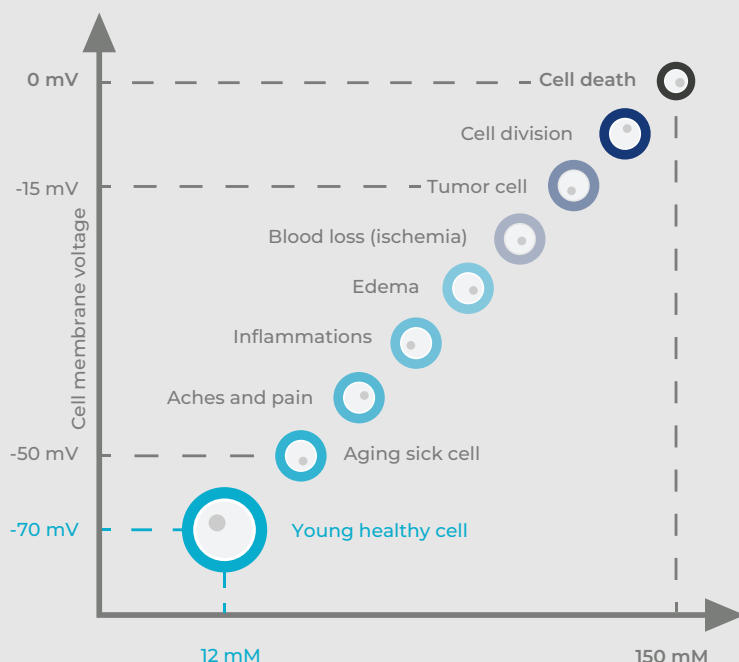

Cells are the building blocks of the human body. Organs are made of cells, and the body contains approximately 30 trillion of them.

Our bodies exhibit electrical activity, giving rise to unique patterns and frequencies that are part of our everyday functioning.

Frequency application is believed to be helpful in regulating the voltage potential; this is the underlying theory to explain why frequency application is a procedure that can be used to support energetic balance in a variety of ways.

Cell membrane voltage model

by Robert O. Becker and Bjorn Nordenstrom

- Increase in **ATP production** by up to 500%
- Increase in **amino acid transport** by up to 40%
- Increase in **protein synthesis** by up to 70%.

According to a study by Ngok Cheng, et al. (Clinical Orthopaedics and Related Research No. 171, November-December 1982.)

This animal study refers to the effect of microcurrent and does not pertain to Healy itself, but to the basic mechanisms on which it builds. These results have not been confirmed by other studies so far and the transfer of the results to Healy would be speculative.

Disclaimer

Healy is a medical device for the treatment of pain in chronic pain, fibromyalgia, skeletal pain and migraine, as well as for the supportive treatment of mental illnesses such as depression, anxiety and related sleep disorders. All other applications of Healy as well as the cell membrane tension model according to Nordenstrom are not recognized by conventional medicine due to lack of evidence in the sense of conventional medicine.

“If you want to find the secrets of the universe, think in terms of Energy, Frequency and Vibration.”

Nikola Tesla

Healy bridges universal energy principles with modern frequency technology, designed to help elevate your everyday wellbeing.

How Healy Works – Energy | Frequency | Vibration

Healy was developed around a simple idea: To support wellbeing interconnectedly and on multiple levels.

Life is not experienced daily in separate compartments. Every aspect of our wellbeing influences another.

Tension affects rest. Rest affects energy. Energy affects focus. And what happens within the body often shapes how we feel, think, and move through the day.

Healy was developed with this broader perspective in mind.

Individualized Microcurrent Frequencies (IMF)

The technology uses low-level electrical currents that may interact with the body's bioelectrical processes.

In the Bioenergetic Field, Quantum Analyzed **Frequencies** are used to support harmony in the field that connects body, mind and soul.

Healy includes a Resonance Sensor that analyzes patterns within the Information Field and identifies frequencies with the highest resonance for the user at that moment.

Together, these technologies create a broad and versatile wellness system designed to support a holistic approach to wellbeing.

Applied through the Healy Coil into the Bioenergetic Field.

High Frequency Carrier Wave

Applied through Healy HighWave for frequency distribution across the whole body.

Each approach works from a different angle. Together, they create a holistic health system that is broad, adaptable and built for real life.
